

Load, Unload and Secure Goods/ Car o

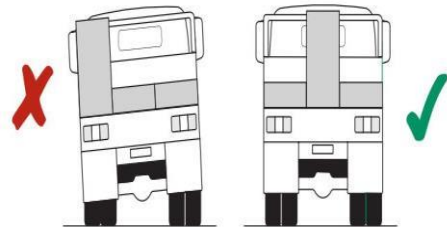

With the recent introduction of the new Chain of Responsibility legislation into Western Australia, significant emphasis has been placed the loading and securing of goods on vehicles.

As a Registered Training Organisation, The Barbaro Group (BG) offers training for the following nationally accredited Units of Competence:

- TLID2004 Load and Unload Goods/ Cargo
- TLIA1001 Secure Loads

Some of the topics covered include:

- Legislative requirements
- Managing associated risks
- Load placement
- Calculating restraint requirements
- Documentation

BG has the capability to deliver this training at our venue located in Hazelmere where we have a purpose built training platform with a number of load configurations available to demonstrate various load restraint methods.

Alternately, we can mobilise trainers to any location and conduct this training at our client's premises. This option is often more appealing as it allows the participants to have hands on exposure in their actual work environment.

This training course consists of in class theory, followed by a practical component and then each participant is required to complete a Practical Workplace Application (PWA). The PWA is a mandatory part of the assessment process to be completed by each participant, in their workplace, in order to be issued with a Statement of Attainment for the training.
