

RECREATIONAL 4WD COURSE

Are you a first time owner of a 4wd vehicle? Would you like to know more about your vehicles capabilities and limitations or would you like to enhance your own skills so that you can safely operate your 4wd vehicle in off road conditions?

Barbaro Group (BG) is pleased to assist you by providing a one day 4wd course that is aimed at Recreational users. The primary focus of this training is to enhance your skills and knowledge of 4wd operations so you can confidently tackle off road driving as safely as possible.

To facilitate this we will cover the following topics:

- Vehicle familiarisation: A review of your vehicle to highlight its features and capabilities
- Recovery Equipment Overview: We will provide you with an insight into different recovery equipment and how to use it safely
- Recovery techniques: We will demonstrate how to recover a vehicle using de bogging aids, exhaust jack and snatch recovery
- We will provide you with guidance and advice on techniques for driving in off road conditions

Our course commences at 8.00am with a briefing on the day's activities and then all vehicles involved will move in convoy to the off road driving location. Once in location, our instructors will talk about obstacles and how to negotiate them safely.

BG conducts this course to meet demand, which usually equates to once a month. Courses are conducted on a Sunday.

Participants in this course will bring their own vehicle, with no limit on passengers, and you are welcome to swap drivers within your vehicle to share the experience.
